## Typical Product Specifications & Properties

# 1-aminocyclopentanecarbonitrile

CAS Number : 4419-11-8

| Specifications     | Limits                                                                                                                                                                     |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Insolubility       | in water                                                                                                                                                                   |
| Melting Point      | 45-70 c                                                                                                                                                                    |
| Molecular weight   | 248.37                                                                                                                                                                     |
| Solubility         | toluene, methanol, ethanol                                                                                                                                                 |
