## Typical Product Specifications & Properties

# 1-Bromo-3- Chloropropane

CAS Number: : 62-23-7

| Specifications     | Limits                                                                              |
|--------------------|-------------------------------------------------------------------------------------|
| Density            | 1.5497                                                                              |
| Melting Point      | 238 c                                                                               |
| Insolubility       | in cold water                                                                       |
| Molecular weight   | 167.12                                                                              |
| Solubility         | alcohol, acetone hot water                                                          |
