## Typical Product Specifications & Properties

# 2-Amino-3-bromo-5-methylpyridine

CAS Number: : 17282-00-7

| Specifications     | Limits                                                                                                                                                                                                                                                                                |
|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Appearance         | Light brown crystalline powder                                                                                                                                                                                                                                                        |
| Molecular weight   | 187.04                                                                                                                                                                                                                                                                                |
| Melting Point      | 73-76 C                                                                                                                                                                                                                                                                               |
| Chemical Structure | <br>The chemical structure shows a pyridine ring with a methyl group at position 5, a bromine atom at position 3, and an amino group at position 2. The Parchem logo is overlaid on the structure. |
