## Typical Product Specifications & Properties

# 3-Sodiosulfobenzoic Acid

CAS Number: : 17625-03-5

| Specifications         | Limits                                      |
|------------------------|---------------------------------------------|
| Appearance             | free flowing crystalline solid              |
| Color                  | white to off-white                          |
| Melting Point          | >300 C                                      |
| Absorptivity           | 0.30 mL/g cm at 450 nm                      |
| Assay                  | 99.0% min                                   |
| Sodium Sulfate Content | 0.40% max                                   |
| Chlorides              | 0.01% max                                   |
| Acidity                | 0.20% max as H <sub>2</sub> SO <sub>4</sub> |
| Volatiles              | 1.0% max                                    |
| Iron                   | 15.0 ppm max                                |
| Odor                   | essentially odorless                        |
| Color                  | 30 APHA max (5% in water)                   |
