| Assay/Purity       | Typically NLT 98%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Chemical Structure |  <p>The chemical structure of Abacavir Sulfate is shown. It consists of two abacavir molecules linked by a diphosphate group. Each abacavir molecule features a 2,6-diaminopurine ring system attached to a 4'-thiopyranose sugar moiety. The diphosphate group connects the 3' and 5' positions of the two sugar rings. The structure is overlaid with the Parchem logo and the text 'fine &amp; specialty chemicals'.</p> |
