## Typical Product Specifications & Properties

# Acenocoumarol

CAS Number: : 152-72-7

| Specifications     | Limits                                                                                                                                                                                                                                                                                                                                               |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Assay/Purity       | Typically NLT 98%                                                                                                                                                                                                                                                                                                                                    |
| Molecular weight   | 353.3255                                                                                                                                                                                                                                                                                                                                             |
| Chemical Structure | <br>The chemical structure of Acenocoumarol is shown. It features a coumarin core with a 4-nitrophenyl group at position 2 and a 3-oxo-1-phenylpropyl group at position 3. The structure is overlaid with a faint 'parchem fine & specialty chemicals' watermark. |
