## Typical Product Specifications & Properties

# Acetic acid-d4

CAS Number: : 1186-52-3

| Specifications | Limits                                  |
|----------------|-----------------------------------------|
| Boiling Point  | 118°                                    |
| Form           | Liquid                                  |
| Solubility     | Soluble in water and ethanol and ether. |
| Density        | 1.12                                    |
| Sensitivity    | Moisture Sensitive                      |
| Flash Point    | 40° (104°F)                             |
| Formula Weight | 64.08                                   |
