## Typical Product Specifications & Properties

# Aluminum Nitrate 9H<sub>2</sub>O ACS

CAS Number: : 7784-27-2

| Specifications             | Limits                            |
|----------------------------|-----------------------------------|
| Direct Evaporative Cooling | 150 c                             |
| Melting Point              | 73 c                              |
| Molecular weight           | 375.19                            |
| Color                      | colorless plates or white crystal |
| Solubility                 | cold water, alcohol, acetone      |
