## Typical Product Specifications & Properties

# Aminoglutethimide

CAS Number: : 125-84-8

| Specifications     | Limits                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| Assay/Purity       | Typically NLT 98%                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Molecular weight   | 232.2783                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Chemical Structure |  <p>The chemical structure of Aminoglutethimide is shown. It features a central carbon atom bonded to a phenyl ring with an amino group (-NH<sub>2</sub>), a methyl group, and a five-membered imide ring. The imide ring is fused to a six-membered ring containing a carbonyl group and a hydrogen atom. The structure is overlaid with a faint Parchem logo.</p> |
