Typical Product Specifications & Properties

Calcium Sulfate Dihydrate

CAS Number: :

Specifications	Limits
Chemical Structure	 The chemical structure shows a central Calcium (Ca) atom with a +2 charge, bonded to two Sulfate (SO4) groups. Each Sulfate group consists of a central Sulfur (S) atom with a +6 charge, bonded to four Oxygen (O) atoms. Two of these Oxygen atoms are part of hydroxyl groups (OH) and are also bonded to Hydrogen (H) atoms, representing the two water molecules of hydration. The entire structure is shown with the Parchem logo and name in the background.
