## Typical Product Specifications & Properties

# Phosphorus Pentasulphide

CAS Number: : 1314-80-3

| Specifications             | Limits                                                                              |
|----------------------------|-------------------------------------------------------------------------------------|
| Boiling Point              | 513-515 c                                                                           |
| Density                    | 2.09                                                                                |
| Direct Evaporative Cooling | by water releasing hydrogen sulfide                                                 |
| Odor                       | rotten egg odor                                                                     |
| Melting Point              | 286-290 c                                                                           |
| Molecular weight           | 222.27                                                                              |
| Solubility                 | carbon disulfide, alkali hydroxide aq. solns.                                       |
| Chemical Structure         |  |
