

Typical Product Specifications & Properties

Zolmitriptan

CAS Number: : 139264-17-8

Specifications	Limits
Molecular weight	287.3568
Assay/Purity	Typically NLT 98%
Chemical Structure	 The chemical structure of Zolmitriptan is shown. It features a 1,2,3,4-tetrahydro-1H-indole-5-carboxamide core. The indole ring is substituted at the 3-position with a 2-methyl-2-(dimethylamino)ethyl group. The carboxamide group is part of a 5-membered ring system, specifically a 1,2,3,4-tetrahydro-1H-indole-5-carboxamide derivative. The structure is overlaid with a watermark for 'parchem fine & specialty chemicals'.
