## Typical Product Specifications & Properties

# (1R)-(+)-Isomenthol

CAS Number: : 23283-97-8

| Specifications        | Limits                                                                    |
|-----------------------|---------------------------------------------------------------------------|
| Molecular weight      | 156.27                                                                    |
| EINECS                | 245-554-6                                                                 |
| SMILES                | <chem>C1[C@@H]([C@H](C[C@@H](C)C1)O)C(C)C</chem>                          |
| InChI                 | 1S/C10H20O/c1-7(2)9-5-4-8(3)6-10(9)11/h7-11H,4-6H2,1-3H3/t8-,9-,10+/m0/s1 |
| InChIKey              | NOOLISFMXDJSKH-LPEHRKFASA-N                                               |
| log P (octanol-water) | 3.19                                                                      |
| Melting Point         | 79.5 &deg; C                                                              |
| Melting Point         | 77-83&deg;C                                                               |
| Density               | 0,9 g/cm3                                                                 |
| Boiling Point         | 218-219&deg;C                                                             |
| Storage Temperature   | 2-8&deg;C                                                                 |
