## Typical Product Specifications & Properties

# (+)-4-(2-methylbutyl)phenyl 4-(dodecyloxy)benzoate

CAS Number: : 83846-95-1

| Specifications   | Limits                                                                                                                                              |
|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| Molecular weight | 452.67                                                                                                                                              |
| EINECS           | 281-075-9                                                                                                                                           |
