## Typical Product Specifications & Properties

# 1,2,3-Benzotriazole(BTA)

CAS Number: : 95-14-7

| Specifications    | Limits                                                       |
|-------------------|--------------------------------------------------------------|
| Sparingly Soluble | in water                                                     |
| Appearance        | Yellow transparent liquid                                    |
| Active Content    | $\geq 30.0\%$                                                |
| Density @ 20C     | 1.12(+0.1) g/cm <sup>3</sup>                                 |
| Melting Point     | 98.5 c                                                       |
| Odor              | odorless                                                     |
| Molecular weight  | 119.12                                                       |
| Flash Point       | 110 c                                                        |
| Solubility        | alcohol, benzene, toluene, chloroform, dmf, most org. solvs. |
| Boiling Point     | 204 (15 mm)                                                  |
