## Typical Product Specifications & Properties

# 1-ACETONAPHTHONE

CAS Number: : 941-98-0

| Specifications   | Limits                                                    |
|------------------|-----------------------------------------------------------|
| Molecular weight | 170.21                                                    |
| EINECS           | 215-691-6                                                 |
| InChI            | 1S/C12H10O/c1-9(13)11-8-4-6-10-5-2-3-7-12(10)11/h2-8H,1H3 |
| InChIKey         | QQLIGMASAVJVON-UHFFFAOYSA-N                               |
| Melting Point    | 2040 &deg;C                                               |
| Refractive Index | 1.628                                                     |
| Form             | powder                                                    |
| Flash Point      | >230 &deg;F                                               |
| Water solubility | immiscible                                                |
| BRN Number       | 1100618                                                   |
| Boiling Point    | 302 &deg;C                                                |
| Density          | 1.119                                                     |
