## Typical Product Specifications & Properties

# 1-Bromohexane

CAS Number: : 111-25-1

| Specifications   | Limits                                                                        |
|------------------|-------------------------------------------------------------------------------|
| Molecular weight | 165.07                                                                        |
| EINECS           | 203-850-2                                                                     |
| Flash Point      | 135 &deg;F                                                                    |
| Melting Point    | -85 &deg;C                                                                    |
| Vapor Pressure   | <10 mm Hg ( 20 &deg;C)                                                        |
| Boiling Point    | 154-158 &deg;C                                                                |
| Refractive Index | 1.448                                                                         |
| BRN Number       | 1731290                                                                       |
| Vapor Density    | 5.7                                                                           |
| Density          | 1.176 g/mL at 25 &deg;C                                                       |
| Stability        | Stable. Incompatible with strong oxidizing agents, strong bases. Combustible. |
