## Typical Product Specifications & Properties

# 1-bromopropan-2-ol

CAS Number: : 19686-73-8

| Specifications      | Limits                                                                                  |
|---------------------|-----------------------------------------------------------------------------------------|
| Molecular weight    | 138.99                                                                                  |
| EINECS              | 243-225-1                                                                               |
| Form                | Liquid                                                                                  |
| Storage Temperature | Refrigerator                                                                            |
| Density             | 1.53 g/mL at 25 &deg;C                                                                  |
| Refractive Index    | 1.480                                                                                   |
| Flash Point         | 130 &deg;F                                                                              |
| Stability           | Stable. Combustible. Incompatible with strong oxidizing agents. May be light sensitive. |
| Color               | Clear colorless to brown                                                                |
| Boiling Point       | 145-148 &deg;C                                                                          |
