## Typical Product Specifications & Properties

# 1-Octadecene

CAS Number : 112-88-9

| Specifications     | Limits                                                                              |
|--------------------|-------------------------------------------------------------------------------------|
| Slightly Soluble   | in water                                                                            |
| Melting Point      | 63 f                                                                                |
| Odor               | mild hydrocarbon odor                                                               |
| Molecular weight   | 252.49                                                                              |
| Color              | colorless liquid                                                                    |
| Flash Point        | (seta) 312 f                                                                        |
| Specific gravity   | 0.792                                                                               |
| Boiling Point      | 586-615 f                                                                           |
