## Typical Product Specifications & Properties

# 2-Ethylhexyl Methacrylate

CAS Number: : 688-84-6

| Specifications              | Limits                                                                              |
|-----------------------------|-------------------------------------------------------------------------------------|
| Color (APHA)                | 20 Max                                                                              |
| Purity                      | 99.0% min                                                                           |
| Specific Gravity (20°C/4°C) | 0.881~0.887                                                                         |
| Acidity                     | 0.01 Max                                                                            |
| Water when shipped          | 0.1 Max                                                                             |
| Inhibitor (MEHQ)            | 25ppm                                                                               |
| Molecular weight            | 198.34                                                                              |
