## Typical Product Specifications & Properties

# 2-Hydroxyethyl Acrylate

CAS Number: : 818-61-1

| Specifications         | Limits                                                                              |
|------------------------|-------------------------------------------------------------------------------------|
| Density                | 1.011                                                                               |
| Inhibitor (MEHQ)       | 200 +/- 20 ppm                                                                      |
| Assay                  | 97.5% Min (by GC)                                                                   |
| Color (APHA)           | 30 Max                                                                              |
| Appearance             | Clear Liquid                                                                        |
| Residual Acid (as MAA) | 0.15% Max                                                                           |
| Water Content          | 0.2% Max                                                                            |
| Molecular weight       | 116.12                                                                              |
| Flash Point            | (cc) 209 f                                                                          |
| Boiling Point          | 90-92 c (12 mm)                                                                     |
