Typical Product Specifications & Properties

3,7-dimethyl-2,6-octadien-1-yl cyclopropyl carboxamide

CAS Number: : 744251-93-2

Specifications	Limits
Flash Point	456.00 °F.TCC
Appearance	white to pale yellow solid
logP (o/w)	3.32
Assay	98.00 to 100.00 %
Boiling Point	388.00 to 389.00 °C. @ 760.00 mm Hg
Odor	roasted meaty
Melting Point	53.00 to 57.00 °C. @ 760.00 mm Hg
Chemical Structure	 The chemical structure shows a cyclopropyl ring attached to a carboxamide group (-CONH-). The nitrogen atom is connected to a side chain that contains two double bonds and two methyl groups, specifically a 3,7-dimethyl-2,6-octadien-1-yl group.
