## Typical Product Specifications & Properties

# A-D-Glucose Pentaacetate

CAS Number: : 604-68-2

| Specifications     | Limits                                                                                                                                                                                                                                                                                                                                                     |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Chemical Structure | <br>The chemical structure shows a glucose molecule in its cyclic pyranose form, with all five hydroxyl groups acetylated. The acetate groups are attached to the C2, C3, C4, C5, and C6 positions. The structure is drawn with stereochemistry indicating the D-isomer. |
