## Typical Product Specifications & Properties

# (-)-alpha-fenchol

CAS Number: : 512-13-0

| Specifications   | Limits                                                                                           |
|------------------|--------------------------------------------------------------------------------------------------|
| Assay            | 98.00 to 100.00 %                                                                                |
| Taste            | Intense camphoraceous, cooling, piney with an earthy nuance. minty-citrus lime and spicy notes   |
| Appearance       | white powder                                                                                     |
| Specific gravity | 0.94300 @ 25.00 °C                                                                               |
| Boiling Point    | 202.00 to 203.00 °C. @ 760.00 mm Hg                                                              |
| Vapor Pressure   | 0.069300 mm/Hg @ 25.00 °C                                                                        |
| Vapor Density    | 5.3                                                                                              |
| logP (o/w)       | 2.71                                                                                             |
| Odor             | Clean cooling camphoraceous, piney with a woody eucalyptol and slight green herbal minty nuances |
| Refractive Index | 1.46500 @ 20.00 °C                                                                               |
| Odor Type        | earthy                                                                                           |
| Melting Point    | 37.00 to 39.00 °C. @ 760.00 mm Hg                                                                |
