## Typical Product Specifications & Properties

# Aluminum Hydroxide/Magnesium hydroxide - MAGALDRATE C632

CAS Number: : 1317-26-6

| Specifications                  | Limits                     |
|---------------------------------|----------------------------|
| Al(OH) <sub>3</sub>             | 32.1-45.9%                 |
| Rosett - Rice titration         | min. 35 minutes            |
| Cl                              | max. 0.2%                  |
| Na                              | max. 0.11%                 |
| As                              | max. 8 ppm                 |
| Heavy Metals                    | max. 60 ppm                |
| Mg(OH) <sub>2</sub>             | 49.2-66.6%                 |
| SO <sub>4</sub>                 | 13.3-17.5%                 |
| pH                              | 7.0-10.0                   |
| Acid Neutralizing Capacity, USP | min. 80%                   |
| Assay                           | min. 20% (Magaldrate)      |
| Viscosity                       | approx. 1000 m Pas LV 3/60 |
