## Typical Product Specifications & Properties

# Arachidic acid

CAS Number: : 506-30-9

| Specifications     | Limits                                                                              |
|--------------------|-------------------------------------------------------------------------------------|
| Density            | 0.8240 (1004 c)                                                                     |
| Slightly Soluble   | in alcohol                                                                          |
| Very Soluble       | in hot abs. alcohol, ether                                                          |
| Melting Point      | 75.4 c                                                                              |
| Insolubility       | in water                                                                            |
| Refractive Index   | 1.4250                                                                              |
| Molecular weight   | 312.54                                                                              |
| Boiling Point      | 328 c                                                                               |
