## Typical Product Specifications & Properties

# Bismuth Subsalcylate

CAS Number: : 14882-18-9

| Specifications             | Limits                                       |
|----------------------------|----------------------------------------------|
| Direct Evaporative Cooling | by boiling water, alkalis to more basic salt |
| Insolubility               | in water, alcohol, ether                     |
| Odor                       | odorless                                     |
| Molecular weight           | 362.10                                       |
| Solubility                 | acids, alkalis                               |
| Assay/Purity               | Typically NLT 98%                            |
