## Typical Product Specifications & Properties

# Butyryl Chloride

CAS Number: : 141-75-3

| Specifications     | Limits                                                                              |
|--------------------|-------------------------------------------------------------------------------------|
| Boiling Point      | 102 c                                                                               |
| Density            | 1.026 gml                                                                           |
| Reactivity         | with water, 95 ethanol                                                              |
| Very Soluble       | in ether                                                                            |
| Odor               | pungent odor                                                                        |
| Melting Point      | -89 c                                                                               |
| Molecular weight   | 106.56                                                                              |
| Refractive Index   | 1.4111 (20 c)                                                                       |
| Color              | colorless clear liquid                                                              |
| Flash Point        | 21 c                                                                                |
| Solubility         | dmso, acetone                                                                       |
