## Typical Product Specifications & Properties

# Cinoxate

CAS Number: : 104-28-9

| Specifications               | Limits                                                                                   |
|------------------------------|------------------------------------------------------------------------------------------|
| Molecular weight             | 250.29                                                                                   |
| SMILES                       | <chem>c1(ccc(cc1)OC)/C=C/C(=O)OCCOCC</chem>                                              |
| InChI                        | CMDKPGRTAQVGFQ-RMKNXTFCSA-N                                                              |
| InChIKey                     | 1S/C14H18O4/c1-3-17-10-11-18-14(15)9-6-12-4-7-13(16-2)8-5-12/h4-9H,3,10-11H2,1-2H3/b9-6+ |
| Melting Point                | -2.50E+01 &deg; C                                                                        |
| Atmospheric OH Rate Constant | 5.58E-11 cm3/molecule-sec                                                                |
| log P (octanol-water)        | 2.650                                                                                    |
| Water solubility             | 500 mg/L                                                                                 |
