## Typical Product Specifications & Properties

# Di-(2-ethylhexyl)phosphoric acid

CAS Number: : 298-07-7

| Specifications     | Limits                             |
|--------------------|------------------------------------|
| Viscosity          | liq.                               |
| Slightly Soluble   | in water                           |
| Melting Point      | -60 c                              |
| Refractive Index   | 1.44-1.444                         |
| Molecular weight   | 322.42                             |
| Flash Point        | 137 c                              |
| Specific gravity   | 0.975                              |
| Solubility         | c6h6, hexane, 4-methyl-2-pentanone |
| Boiling Point      | 155 c (0.015 mm)                   |
| Chemical Structure |                                    |
