## Typical Product Specifications & Properties

# Diisopropylamine Reagent Grade

CAS Number: : 108-18-9

| Specifications                 | Limits                    |
|--------------------------------|---------------------------|
| Density                        | 0.7162 (2020 c)           |
| Surface Tension                | 19.11 dynescm             |
| Auto/Self Ignition Temperature | temp. 316 c               |
| Slightly Soluble               | in water                  |
| Melting Point                  | -61 c                     |
| Assay %                        | 99.0% min                 |
| Color (APHA)                   | 10 max                    |
| Distillation Range             | 82~85 degC                |
| Water (wt)                     | 0.2% max                  |
| Vapor Pressure                 | 81.157 mm hg              |
| Odor                           | amine, ammonia fishy odor |
| Refractive Index               | 1.3924 (20 c)             |

| Specifications   | Limits                                                  |
|------------------|---------------------------------------------------------|
| Molecular weight | 101.19                                                  |
| Color            | colorless volatile liquid                               |
| Flash Point      | (oc) -1.11 c                                            |
| Solubility       | most org. solvs. incl. ethanol, acetone, ether, benzene |
| Boiling Point    | 83.9 c                                                  |
