## Typical Product Specifications & Properties

# Disodium 4-nitrophenylphosphate

CAS Number: : 4264-83-9

| Specifications      | Limits                                                                                                     |
|---------------------|------------------------------------------------------------------------------------------------------------|
| Molecular weight    | 263.05                                                                                                     |
| EINECS              | 224-246-5                                                                                                  |
| SMILES              | <chem>[Na+].[Na+].[O-][N+](=O)c1ccc(OP(=O)([O-])[O-])cc1</chem>                                            |
| Melting Point       | >300 °C                                                                                                    |
| Solubility          | H <sub>2</sub> O: 1 tablet/3 mL 25 mM, clear, light yellow                                                 |
| Form                | tablets                                                                                                    |
| Stability           | Stable, but may be light sensitive. Incompatible with strong acids, strong bases, strong oxidizing agents. |
| Storage Temperature | 2-8°C                                                                                                      |
| Color               | white to pale yellow                                                                                       |
| BRN Number          | 5324661                                                                                                    |
