## Typical Product Specifications & Properties

# Ethyl chrysanthemate

CAS Number: : 97-41-6

| Specifications      | Limits                                                              |
|---------------------|---------------------------------------------------------------------|
| Molecular weight    | 196.29                                                              |
| EINECS              | 202-579-7                                                           |
| SMILES              | CCOC(=O)C1C(C=C(C)C)C1(C)C                                          |
| InChI               | 1S/C12H20O2/c1-6-14-11(13)10-9(7-8(2)3)12(10,4)5/h7,9-10H,6H2,1-5H3 |
| InChIKey            | VIMXTGUGWLAOFZ-UHFFFAOYSA-N                                         |
| Boiling Point       | 112 &deg;C/10 mm Hg                                                 |
| Refractive Index    | 1.461                                                               |
| Storage Temperature | 2-8&deg;C                                                           |
| Flash Point         | 184 &deg;F                                                          |
| Density             | 0.906 g/mL at 25 &deg;C                                             |
