## Typical Product Specifications & Properties

# Green Tea 95%

CAS Number: : 121-44-8

| Specifications                 | Limits                                   |
|--------------------------------|--|
| Surface Tension                | 20.66 dynescm                            |
| Dielectric Constant            | 2.423                                    |
| Auto/Self Ignition Temperature | temp. 249 c                              |
| Very Soluble                   | in chloroform, acetone, benzene          |
| Vapor Pressure                 | 53.5 mm hg                               |
| Odor                           | strong ammoniacal odor                   |
| Refractive Index               | 1.4000                                   |
| Molecular weight               | 101.22                                   |
| Color                          | colorless liquid                         |
| Flash Point                    | (cc) -9 c                                |
| Specific gravity               | 0.7293 (2020 c)                          |
| Solubility                     | water, alcohol, ether, other org. solvs. |
