Typical Product Specifications & Properties

N-Acetyl-L-tyrosine

CAS Number : 537-55-3

Specifications	Limits
Practically Insoluble	ss
Very Soluble	in water
Melting Point	145-150 c
Molecular weight	223.23
Chemical Structure	 The chemical structure of N-Acetyl-L-tyrosine is shown. It consists of a benzene ring with a para-hydroxyl group (-OH) and a side chain at the 1-position. The side chain is -CH2-CH(NH-C(=O)-CH3)-COOH. The amino group is shown as a blue nitrogen atom with two hydrogen atoms, and the carboxylic acid group is shown as a red carbon atom double-bonded to an oxygen atom and single-bonded to a hydroxyl group (-OH).
