## Typical Product Specifications & Properties

# Phenol-D6

CAS Number: : 13127-88-3

| Specifications      | Limits                                                                         |
|---------------------|--------------------------------------------------------------------------------|
| Molecular weight    | 100.15                                                                         |
| EINECS              | 236-063-8                                                                      |
| InChI               | 1S/C6H6O/c7-6-4-2-1-3-5-6/h1-5,7H/i1D,2D,3D,4D,5D/hD                           |
| InChIKey            | ISWSIDIOOBJBQZ-QNKSCLMFSA-N                                                    |
| Boiling Point       | 182 &deg;C                                                                     |
| Vapor Pressure      | 0.36 mm Hg ( 20 &deg;C)                                                        |
| Storage Temperature | 2-8&deg;C                                                                      |
| Melting Point       | 40-42 &deg;C                                                                   |
| Density             | 1.140 g/mL at 25 &deg;C                                                        |
| Flash Point         | 175 &deg;F                                                                     |
| Stability           | Stable. Incompatible with strong acids, strong bases, strong oxidizing agents. |
| Vapor Density       | 3.24                                                                           |
