## Typical Product Specifications & Properties

# Polyacrylic Acid Sodium

CAS Number: : 9003-04-7

| Specifications                          | Limits                                       |
|-----------------------------------------|----------------------------------------------|
| Solid Content                           | = 30%                                        |
| Free Monomer (CH <sub>2</sub> =CH-COOH) | <= 0.5%                                      |
| Density @ 20C                           | >= 1.15 g/cm <sup>3</sup>                    |
| ph (1% solution)                        | 6.0 - 8.0                                    |
| Appearance                              | Colorless or light yellow transparent liquid |
| Molecular weight                        | 2000-2300                                    |
