## Typical Product Specifications & Properties

# Sodium formaldehyde sulfoxylate

CAS Number: : 149-44-0 6035-47-8 (dihydrate)

| Specifications              | Limits                           |
|-----------------------------|----------------------------------|
| Chemical Structure          |                                  |
| Sensoric                    | Small lumps or fine white powder |
| Assay %                     | >= 98%                           |
| pH of 10% water solution    | 9.5 - 10.5                       |
| Alkalinity (0.10N H2so4/2g) | (as Na2CO3 ) : 2, -/3,5%         |
| Iron                        | <= 1 ppm                         |
| Water Insolubles, wt%       | None                             |
| Grain size                  | Lumps 5 -10 mm                   |
