## Typical Product Specifications & Properties

# Sodium Triacetoxyborohydride

CAS Number: : 56553-60-7

| Specifications      | Limits                                       |
|---------------------|----------------------------------------------|
| Molecular weight    | 211.94                                       |
| SMILES              | [Na+].CC(=O)O[BH-](OC(C)=O)OC(C)=O           |
| Merck               | 8695                                         |
| BRN Number          | 4047608                                      |
| Storage Temperature | Flammables + water-Freezer (-20&deg;C)e area |
| Water solubility    | reacts                                       |
| Melting Point       | 116-120 &deg;C (dec.)                        |
| Sensitive           | Moisture Sensitive                           |
