## Typical Product Specifications & Properties

# TALL OIL HL

CAS Number: : 8002-26-4

| Specifications        | Limits                                                                                            |
|-----------------------|---------------------------------------------------------------------------------------------------|
| Density               | 0.95                                                                                              |
| Acid Value, mg KOH/g  | 80                                                                                                |
| Density @ 20°C, g/m3  | 0.980                                                                                             |
| Saponification Value  | 115                                                                                               |
| Unsaponifiable Matter | 30%                                                                                               |
| Description           | Mixture of tall oil derivatives.                                                                  |
| Appearance            | Black viscous liquid.                                                                             |
| Stability             | Stability about 6 months in standard conditions (under cover at temperatures between 5 and 30°C). |
| Odor                  | dk. brn. liq., acid odor                                                                          |
| Acid Number           | 178 min.                                                                                          |
| Flash Point           | 182 c                                                                                             |
| Solubility            | methanol, diethyl ether, acetone                                                                  |
