## Typical Product Specifications & Properties

# (Z)-4-dodecen-1-al

CAS Number: : 21944-98-9

| Specifications     | Limits                                                                              |
|--------------------|-------------------------------------------------------------------------------------|
| Appearance         | colorless clear liquid                                                              |
| Specific gravity   | 0.84300 to 0.84700 @ 25.00 °C                                                       |
| Pounds/Gallon      | 7.015 to 7.048                                                                      |
| Refractive Index   | 1.44300 to 1.44900 @ 20.00 °C                                                       |
| Boiling Point      | 253.00 to 254.00 °C. @ 760.00 mm Hg                                                 |
| Flash Point        | 228.00 °F.TCC                                                                       |
| Odor Type          | aldehydic                                                                           |
| Odor               | aldehydic citrus fruity                                                             |
| Vapor Pressure     | 0.015500 mm/Hg @ 25.00 °C                                                           |
| Assay              | 94.00 to 100.00 %                                                                   |
| logP (o/w)         | 4.83                                                                                |
