## Typical Product Specifications & Properties

# (Z)-5-octen-1-yl propionate

CAS Number: : 196109-18-9

| Specifications   | Limits                                                                                             |
|------------------|----------------------------------------------------------------------------------------------------|
| Appearance       | colorless clear liquid                                                                             |
| Specific gravity | 0.88000 to 0.88900 @ 25.00 °C                                                                      |
| Pounds/Gallon    | 7.322 to 7.397                                                                                     |
| Taste            | Green waxy fruit, fleshy apple, pineapple, banana, nice mouth feel with melon and tropical nuances |
| Flash Point      | 195.00 °F.TCC                                                                                      |
| Assay            | 93.00 to 100.00 % sum of isomers                                                                   |
| Refractive Index | 1.43100 to 1.44000 @ 20.00 °C                                                                      |
| Boiling Point    | 70.00 °C. @ 0.50 mm Hg                                                                             |
| Vapor Pressure   | 0.028000 mm/Hg @ 25.00 °C                                                                          |
| logP (o/w)       | 4.01                                                                                               |
| Odor Type        | green                                                                                              |
| Odor             | green leaf woody apple banana watermelon                                                           |
