## Typical Product Specifications & Properties

# (E,E)-farnesyl acetone

CAS Number: : 1117-52-8

| Specifications     | Limits                                                                                                                           |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------|
| logP (o/w)         | 6.16                                                                                                                             |
| Appearance         | colorless to pale yellow clear liquid                                                                                            |
| Assay              | 94.00 to 100.00 %                                                                                                                |
| Boiling Point      | 368.00 to 370.00 °C. @ 760.00 mm Hg                                                                                              |
| Odor               | flower ether                                                                                                                     |
| Vapor Pressure     | 0.000009 mm/Hg @ 25.00 °C                                                                                                        |
| Chemical Structure | <br><chem>CC(=O)CC=CC=CC(C)CC(C)CC(C)C</chem> |
| Flash Point        | 284.00 °F.TCC                                                                                                                    |
