## Typical Product Specifications & Properties

# (S)-(+)-2-Aminobutane

CAS Number: : 513-49-5

| Specifications      | Limits                                         |
|---------------------|------------------------------------------------|
| Molecular weight    | 73.14                                          |
| EINECS              | 208-164-7                                      |
| SMILES              | <chem>CC[C@H](C)N</chem>                       |
| InChI               | 1S/C4H11N/c1-3-4(2)5/h4H,3,5H2,1-2H3/t4-/m1/s1 |
| InChIKey            | BHRZNVHARXXAHW-SCSAIBSYSA-N                    |
| Flash Point         | -3 &deg;F                                      |
| Boiling Point       | 63 &deg;C                                      |
| Storage Temperature | Flammables area                                |
| Merck               | 14,1544                                        |
| Alpha               | 7.5 ° (C=NEAT 19 °C)                           |
| Sensitive           | Air Sensitive                                  |
| BRN Number          | 1718760                                        |
