## Typical Product Specifications & Properties

# 1-(2-Bromoethyl)-4-fluorobenzene

CAS Number: : 332-42-3

| Specifications   | Limits                                                  |
|------------------|---------------------------------------------------------|
| Molecular weight | 203.05                                                  |
| Density          | 1.4498 g/mL at 25 &deg;C                                |
| Form             | Liquid or Low Melting Solid                             |
| Boiling Point    | 100-104 &deg;C/15 mm Hg                                 |
| Refractive Index | 1.534                                                   |
| Color            | Clear colorless to light yellow or white to pale yellow |
| Flash Point      | 200 &deg;F                                              |
