## Typical Product Specifications & Properties

# 1-Cbz-2,5-Dihydro-1H-Pyrrole

CAS Number: : 31970-04-4

| Specifications     | Limits                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Chemical Structure | <br>The chemical structure shows a benzyl group (a benzene ring attached to a CH2 group) connected via an ester linkage to a 2,5-dihydro-1H-pyrrole ring. The pyrrole ring has a nitrogen atom at position 1 and double bonds between carbons 2 and 3, and between carbons 4 and 5. The ester group is attached to the carbon at position 2 of the pyrrole ring. The structure is overlaid with a faint Parchem logo. |
