## Typical Product Specifications & Properties

# 1-(Triisopropylsilyl)pyrrole

CAS Number: : 87630-35-1

| Specifications      | Limits                                                            |
|---------------------|-------------------------------------------------------------------|
| Molecular weight    | 223.43                                                            |
| InChI               | 1S/C13H25NSi/c1-11(2)15(12(3)4,13(5)6)14-9-7-8-10-14/h7-13H,1-6H3 |
| InChIKey            | FBQURXLBJJNDBX-UHFFFAOYSA-N                                       |
| Storage Temperature | Room temperature.                                                 |
| Density             | 0.904 g/mL at 25 &deg;C                                           |
| Boiling Point       | 78 &deg;C/0.4 mm Hg                                               |
| Refractive Index    | 1.492                                                             |
| Flash Point         | 224 &deg;F                                                        |
| Water solubility    | Not miscible in water.                                            |
| BRN Number          | 3540663                                                           |
| Sensitive           | Moisture Sensitive                                                |
