## Typical Product Specifications & Properties

# 2-[[1-(2-Amino-acetyl)-pyrrolidine-2-carbonyl]-amino}-propionic acid

CAS Number : 188983-70-2

| Specifications     | Limits                                                                                                                                                                                                                                                                                                                                             |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Chemical Structure | <br>The chemical structure shows a propionic acid chain with an amino group at the 2-position, which is further substituted with a 1-(2-aminoacetyl)pyrrolidine-2-carbonyl group. The pyrrolidine ring is attached to the carbonyl of the propionic acid chain. |
