

Typical Product Specifications & Properties

2-[3-(Trimethylsilyl)propyl]pyridine

CAS Number: : 176643-22-4

Specifications	Limits
Chemical Structure	 <p>The chemical structure shows a pyridine ring substituted at the 2-position with a 3-(trimethylsilyl)propyl group. The pyridine ring is a six-membered aromatic ring with one nitrogen atom. The propyl chain is attached to the 2-position of the ring. The terminal carbon of the propyl chain is bonded to three methyl groups, represented by three lines radiating from a central carbon atom. The structure is overlaid with a faint 'parchem fine & specialty chemicals' watermark.</p>
