## Typical Product Specifications & Properties

# 2,6-Dichlorobenzaldehyde

CAS Number: : 83-38-5

| Specifications   | Limits                                                                                  |
|------------------|-----------------------------------------------------------------------------------------|
| Molecular weight | 175.01                                                                                  |
| EINECS           | 201-472-2                                                                               |
| SMILES           | <chem>Clc1cccc(Cl)c1C=O</chem>                                                          |
| InChI            | 1S/C7H4Cl2O/c8-6-2-1-3-7(9)5(6)4-10/h1-4H                                               |
| InChIKey         | DMIYKWPEFRFTPY-UHFFFAOYSA-N                                                             |
| Stability        | Stable. Incompatible with strong oxidizing agents, strong bases. Air, light and moistur |
| BRN Number       | 386477                                                                                  |
| Boiling Point    | 165&deg;C                                                                               |
| Flash Point      | 135&deg;C                                                                               |
| Melting Point    | 69-71 &deg;C                                                                            |
| Water solubility | <0.1 g/100 mL at 23 &#186;C                                                             |
| Sensitive        | Air Sensitive                                                                           |
